Complex Biostimulants

The EcoStim range of Complex Biostimulants allows the plant to make better use of the nutrients available to it by stimulating the plant's metabolic rate which increases yield, shelf life, soil health and improves nutritional values and flavour.

Biostimulants are not fertilizers. Farmers using Biostimulants should expect yield increases of 20%+ while reducing fertilizer usage.

Book Appointment

Increase in Yield

More crop from the same area with a significant return on investment.

More Bioactive Soil

An increase in the soil micro and mesofauna.

Extended Shelf Life

Reduction in post harvest loss between farm gate and market.

Improved Nutrient Content

An 18% increase in nutrient content in rice.

Country	Crop	Control Yield	EcoStim Yield	Increase	% Increase
Sri Lanka	Rice Lowland	4300 kg/ha	5608 kg/ha	1308 kg/ha	30%
Tanzania	Rice Lowland	2950 kg/ha	3778 kg/ha	828 kg/ha	28%
Kenya	Rice Lowland	6724 kg/ha	8452 kg/ha	1728 kg/ha	26%
Cote d'Ivoire	Rice Lowland	2489 kg/ha	3182 kg/ha	693 kg/ha	28%
